KTQM6715.bin / KTQM7715.bin /KTHM6515.bin / KTHM7615.bin

Improved BIOS feature "Forceboot".

Improved Boot Logo, now big image files can be used (0.4 MB).

Added support for new board PN/Batch numbers.

Added support for PCIe PEG Birfurcation.

Updated ITE firmware to version 1.21.

Updated ME to version 8.1.51.1471

Updated USB module to 4.6.3_USB_08.10.28.

BIOS PCI/PCIe ASPM Support changed to Disabled by default.

KTQM6714.bin / KTQM7714.bin /KTHM6514.bin / KTHM7614.bin

Added BIOS feature "Forceboot".

Updated ITE EC to V19.

Updated USB module to 4.6.3_USB_08.10.26.

Improved BIOS Menu by hiding settings not support by actual CPU.

KTQM6713.bin / KTQM7713.bin /KTHM6513.bin / KTHM7613.bin

Improved DMI support.

Added System fan temperature cruise control function via remote temperature sensor (DS18BS20/LM75).

Added min/max fan speed function in thermal cruise mode.

Added support for SLP1 function.

Added "no password on boot popup menu(f7)" function.

KTQM6712.rom / KTQM7712.rom

Improved Splash Screen support.

Improved PCIe->PCI bridge performance.

Change LAN1 EEPROM to "82579_NVM_rev0.F4_fix.bin".

Increased maximum PCI Bus Enumeration to 128.

Correction of System Temperature Offset.

Improved "Load Default BIOS Settings" Jumper function.

KTQM6711.bin

Internal version. Admin Password added.

KTQM6710.rom, July 19th, 2012:

Fixed problem with some menu disappearing when default is loaded.

Update of AMI core to "4.6.5.3_VEB_1APTJ021"

Common Clock is disabled on all devices
